## ITALIANO

Accessorio di completamento al rampone, divenuto indispensabile per escursioni e arrampicate su neve e ghiaccio. Si fissa sotto il rampone ed impedisce l'accumulo di neve tra le punte, che in alcune situazioni si potrebbe rilevare pericoloso. Gli Antibott C.A.M.P. sono leggeri, pratici e velocemente applicabili. La gomma Vibram® con cui sono realizzati li rende altamente resistenti all'usura. Esiste un sistema Antibott per ogni modello di rampone, per un perfetto adattamento e stabilità d'insieme.

## ENGLISH

The Antibott has become an essential accessory for excursion and climbing on snow and ice with crampons. It takes place under the crampons and avoid the snow build-up. C.A.M.P.'s Antibott are lightweight and easy to attach. High abrasion-resistant thank to the Vibram® rubber. For each crampon we developed a special Antibott shape, for a perfect fit and stability.

## FRANCAIS

Les Antibott sont devenus un accessoire essentiel des crampons pour la randonnée et les courses sur neige et glace. Les Antibott sont montés sous les crampons et évitent à la neige de botter. Les Antibott Camp sont légers et faciles à mettre en place. Leur grande résistance à l'abrasion est donnée par la gomme Vibram®. Pour chaque type de crampon, C.A.M.P. développe un modèle spécifique s'adaptant parfaitement à la forme de celui-ci.

## DEUTSCH

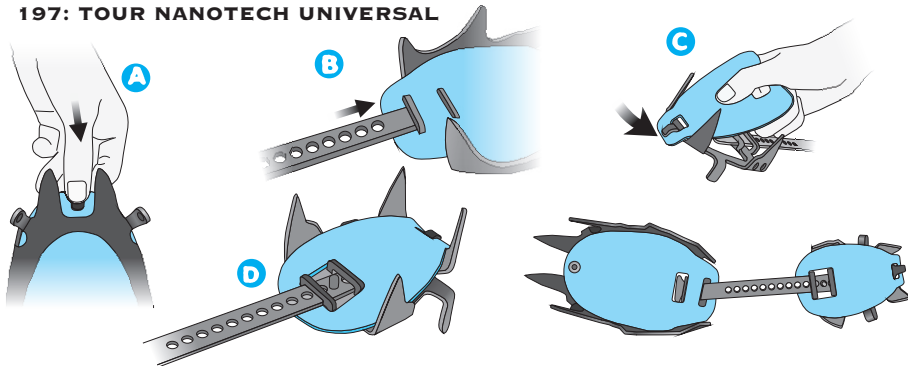

Antistollplatten sind eine sinnvolle Ergänzung für jede Art von Steigeisen. Sie verhindern Stollenbildung unter den Steigeisen und erhöhen somit Ihre Sicherheit. C.A.M.P. Antistollplatten sind leicht und einfach zu montieren. Vibram® Gummi garantieren beste Qualität. Für all unsere Steigeisen gibt es speziell abgestimmte Modelle um bestmögliche Paßform zu gewährleisten.
